

REMARKS

Prior to entry of this paper, Claims 50-120 were pending. In this paper, Claims 50-120 are cancelled without prejudice and new Claims 121-140 are added. Claims 121-140 are currently pending. No new matter has been added. For at least the following reasons, Applicants respectfully submit that each of the presently pending claims is in condition for allowance.

Claims 50-120

It is respectfully submitted that claims 50-120 were allowable, for at least the reasons stated in previous amendments. However, because claims 50-120 are cancelled without prejudice in this paper, it is respectfully submitted that all outstanding rejections and objections are rendered moot.

New Claims 121-140

It is respectfully submitted that new claims 121-140 are allowable at least because the prior art of record does not disclose, teach, or suggest, singly or combination, “a header table that stores: a plurality of data samples that each include a unique data word; and a sequence of data that includes a portion of a repeating horizontal blanking data sequence for horizontal blanking lines, and further includes a repeat field that indicates a number of repetitions for the repeating horizontal blanking sequence.”

CONCLUSION

It is respectfully submitted that each of the presently pending claims are in condition for allowance and notification to that effect is requested. The Examiner is invited to contact Applicant's representative at the below-listed telephone number if it is believed that prosecution of this application may be assisted thereby. Although certain arguments regarding patentability are set forth herein, there may be other arguments and reasons why the claimed invention is patentably distinct. Applicant reserves the right to raise these arguments in the future.
